# Marp

Title slide would go here

[https://alterationx10.com](https://alterationx10.com)

# Second slide

Here is some code

```scala
// Indexes start at 0. Avoid an extra map by prepending an element, and taking the tail.
val priorities: Map[Char, Int] =
  (('a' +: ('a' to 'z')) ++ ('A' to 'Z')).zipWithIndex.tail.toMap
```

# Third most slide

Letters and words, coming together to make sentences.
